Nirikshan AI

Empowering Insight with Intelligence

Building an AI-Ready Tomorrow

Empowering People, Institutions and Industries with AI

AI is changing how work gets done.

The world is moving from traditional workflows to **AI-assisted workflows**.

Tasks that previously required hours of manual effort can increasingly be accelerated through:

- AI assistants
- Automation
- Generative AI
- Data intelligence
- Computer Vision
- AI-powered software
- Intelligent workflows

Nirikshan AI's **10X AI Productivity Initiative** is designed to help people and organisations understand where AI can create real productivity gains and how to use it responsibly and effectively.

Traditional Workflow

Human → Task → Manual Work → Result

AI-Assisted Workflow

Human + AI → Automation → Intelligence → Faster Result

Make people and organisations AI-ready.

Our mission is to empower:

Students › Faculty › Professionals › Management › Organisations

with practical AI knowledge that helps them:

- Work faster
- Automate repetitive work
- Learn faster
- Make better decisions
- Build faster
- Create new opportunities
- Analyse faster

Our belief

> **AI will not simply replace work.**
> People who know how to use AI will increasingly outperform those who don't.

The 10X Philosophy

A shift from manual effort to intelligent work.

By combining human creativity with AI, we can achieve higher productivity, better results and new possibilities.

Traditional Workflow

Manual, time-consuming and repetitive.

Human
Starts the task

Task
Defines the work

Manual Work
Takes hours or days

Result
Delayed outcome

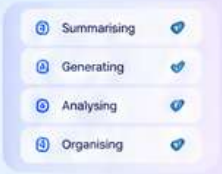

AI-Assisted Workflow

Faster, smarter and more efficient.

Human + AI
Work together

Automation
AI handles repetitive work

Intelligence
Better insights and ideas

Faster Result
Higher quality in less time

The objective isn't to replace people.

The objective is to make people more capable.

Who We Work With

Empowering every stage of learning and professional journey with AI.

PEOPLE
SKILLS
INNOVATION
GROWTH

Schools

AI awareness and productivity programmes for students.

- Early exposure to AI
- Creative learning
- Practical skills
- Future-ready mindset

Universities & Colleges

Industry-oriented AI training, workshops, certifications, projects and internships.

- Hands-on learning
- Real-world projects
- Professional certification
- Internship opportunities

Professionals

AI productivity and workplace upskilling.

- Work smarter
- Increase productivity
- AI tools for daily work
- Stay ahead in your career

Nirikshan AI
Empowering Insight with Intelligence

Management & Leadership

AI adoption, productivity and AI-driven decision-making.

- Strategic AI adoption
- Data-driven decisions
- Leadership for an AI-enabled future
- Responsible and effective implementation

Industries

Enterprise AI training, workforce transformation and AI implementation.

- Employee upskilling
- Process automation
- AI-driven efficiency
- End-to-end AI implementation

Practical AI Skills for a 10X Future

From everyday productivity to advanced AI development, our programmes are designed to help you learn, apply and build real-world skills that create measurable impact.

01 AI Productivity

Work Smarter. Get More Done.

- ChatGPT / AI assistants
- Prompt engineering
- AI research & information gathering
- AI writing (emails, reports, documents)
- AI presentations
- Data analysis with AI
- AI automation (repetitive tasks)
- Time management with AI
- Personal productivity systems
- AI tools for daily workflow

02 Generative AI

Create. Innovate. Build.

- LLMs and advanced models
- AI agents and multi-agent systems
- RAG (Retrieval-Augmented Generation)
- Content generation (text, image, video, audio)
- AI tools ecosystem
- Knowledge assistants
- Custom AI workflows
- AI for creativity and design
- Multilingual content creation
- Building real-world GenAI applications

03 AI for Developers

Build Faster. Code Smarter.

- AI-assisted coding
- Code generation and refactoring
- Debugging and error resolution
- Testing with AI
- Documentation and code explanation
- API development with AI
- Full stack development support
- DevOps and deployment automation
- AI in mobile and web development
- AI tools for software engineering

04 AI for Business

Insights. Efficiency. Growth.

- Business analysis and market research
- Marketing and content strategy
- Sales and customer engagement
- Operations and process improvement
- Customer support automation
- Reporting and data insights
- Decision support systems
- AI for HR and talent management
- Financial analysis and planning
- AI tools for business growth

05 AI for Education

Learn Better. Teach Better.

- AI-assisted learning for students
- Research and academic writing
- Lesson planning for teachers
- Personalised learning support
- Academic content creation
- Assessment and evaluation tools
- Interactive learning materials
- Student project development
- AI in curriculum design
- AI tools for educators and institutions

06 Advanced AI

From Concepts to Real-World Solutions.

- Machine Learning
- Deep Learning
- Computer Vision (image & video analysis)
- Natural Language Processing (NLP)
- Data Science and analytics
- Predictive modelling
- AI application development
- Edge AI and real-time systems
- Domain-specific AI solutions
- Research and advanced implementations

And More

- AI Ethics & Responsible Use
- AI Tools Mastery
- No-Code AI Solutions
- Workflow Automation
- AI for Entrepreneurship
- AI in Research & Innovation
- Industry Use Cases
- Real-World Projects & Internships

The 10X Productivity Framework

A structured approach to help individuals and organisations identify, adopt and scale AI for real and measurable impact.

01 DISCOVER › **02 LEARN** › **03 APPLY** › **04 AUTOMATE** › **05 SCALE**

01 DISCOVER

Identify where AI can improve existing workflows.

- Understand current processes
- Identify pain points
- Find automation opportunities
- Explore AI use cases
- Define goals and expected outcomes

02 LEARN

Understand the right AI tools and techniques.

- Learn relevant AI tools
- Hands-on training
- Prompt engineering
- Best practices
- Responsible and effective use
- Build confidence through practice

03 APPLY

Use AI on real-world tasks.

- Apply AI in daily work
- Create real outputs
- Solve actual problems
- Use AI across different tasks
- Measure time saved
- Improve quality and accuracy

04 AUTOMATE

Reduce repetitive manual work.

- Automate routine tasks
- Set up AI workflows
- Integrate tools and systems
- Use AI agents
- Reduce manual effort
- Increase consistency and speed

05 SCALE

Apply successful AI workflows across teams and organisations.

- Roll out to teams
- Standardise processes
- Train and enable employees
- Monitor impact
- Continuous improvement
- Drive long-term transformation

From insight to impact.

A clear path to become 10X more productive.

From a Day of Work to a 10X Workflow

See how the same task can be completed faster and more efficiently with AI, while maintaining or improving quality.

Before AI

Traditional Workflow

Manual, time-consuming and repetitive.

Research — 2 hours
Search, read and collect information

Writing — 2 hours
Draft and structure content

Analysis — 2 hours
Analyse data and draw insights

Presentation — 2 hours
Create slides and design

Total Time **8 hours**

AI-Assisted Workflow

Smarter Workflow

AI-powered, faster and more efficient.

AI Research
Get summarised and relevant information

AI-assisted Drafting
Generate and refine content

AI Analysis
Analyse data, find insights and create visualisations

AI Presentation
Create professional slides designs and summaries

Human Review
Review, customise and finalise

Potentially reduced to
30–60 minutes*

Real Results Across Different Tasks

Report Creation	Data Analysis	Presentation	Email & Communication
8 hours → 45 mins	6 hours → 30 mins	4 hours → 20 mins	2 hours → 15 mins

Actual productivity gains depend on the task, workflow, tools, and user's ability to use AI effectively.

Tailored Programmes for Every Learner

From classrooms to boardrooms, our AI programmes are designed to build real skills, solve real problems and create future-ready individuals and organisations.

01 For School Students

AI Explorer

Discover. Create. Be Future-Ready.

- AI awareness
- Responsible AI
- AI productivity
- Creative AI
- Research with AI
- Project-based learning

02 For University Students

AI Career Accelerator

Learn. Build. Apply. Get Ahead.

- Generative AI
- AI productivity
- Coding with AI
- Industry projects
- AI/ML
- Computer Vision
- Career readiness

03 For Professionals

10X Professional

Work Smarter. Deliver Greater.

- AI productivity
- AI workplace automation
- AI research
- AI-assisted communication
- Data analysis
- Workflow automation
- Personal efficiency systems

04 For Management & Leadership

AI Leadership

Strategise. Transform. Lead with AI.

- AI strategy
- AI adoption
- Workforce productivity
- Business automation
- AI transformation
- Responsible AI
- Change management and AI culture

05 For Industries

AI Workforce Transformation

Upskill. Automate. Scale.

- Employee AI training
- Department-specific AI
- Workflow analysis
- Automation opportunities
- AI implementation
- Continuous upskilling
- Measurable impact and ROI

Different needs. A common goal.

An AI-ready generation and a more productive organisation.

More Than Training. A Complete AI Ecosystem.

We bring together education, real-world application and advanced AI technology to create meaningful learning experiences and measurable outcomes.

Industry + **Education** + **Technology**

A unique combination that turns learning into real skills, real projects and real opportunities.

01

Training

Structured, practical and outcome-oriented programmes for students, professionals and organisations.

02

Real Projects

Hands-on, real-world projects that solve actual problems and build portfolio-ready experience.

Nirikshan AI
Empowering Insight with Intelligence

03

AI Technology

Latest AI tools, platforms and advanced technologies for practical, real-world usage.

04

Industry Exposure

Interaction with industry experts, real use cases, mentorship and insights from practical implementations.

05

Research & Innovation

Encouraging exploration, building innovative solutions and contributing to impactful research in AI and related fields.

- **Practical Learning with Real Tools**
- **Real-World Problem Solving**
- **Exposure to Industry Use Cases**
- **Innovation and Research Opportunities**
- **Measurable Outcomes**

Learning Today. Real Impact Tomorrow.

Industry + Education + Technology

A unique ecosystem for real-world impact.

Nirikshan AI goes beyond traditional training by connecting education, real projects, industry needs and cutting-edge AI technology — so learners don't just learn, they apply, build and grow.

Industry
Real-world needs, use cases and opportunities.

+

Education
Structured learning, skills and talent development.

+

Technology
Latest AI tools, platforms and innovation.

This powerful combination helps us deliver programmes that are practical, relevant and future-ready.

01 Training

Structured, practical and outcome-oriented programmes.

- Curriculum designed for real-world use
- Hands-on learning
- Beginner to advanced programmes
- Domain-specific training (school, university, professional, industry)
- Focus on practical productivity and skills

02 Real Projects

Hands-on, real-world projects that build actual skills.

- Live projects and case studies
- Problem-solving with real data
- Portfolio-ready outcomes
- Mentorship and guidance
- Exposure to actual industry challenges
- Build solutions that create real impact

03 AI Technology

Access to the latest AI tools, platforms and technologies.

- Generative AI and LLMs
- AI tools and platforms
- AI agents and automation
- Computer Vision, NLP, Data Science
- No-code / low-code AI solutions
- Practical tool usage for everyday work

04 Industry Exposure

Direct interaction with industry experts, use cases and opportunities.

- Expert sessions from industry leaders
- Real industry use cases
- Site visits and industry interactions
- Understanding industry workflows
- Career guidance and opportunities
- Exposure to emerging AI roles and trends

05 Research & Innovation

Encouraging exploration, innovation and real-world solutions.

- Research-oriented learning
- Explore new ideas and AI applications
- Guidance for academic and industry research
- Prototype development
- Hackathons and innovation challenges
- Support for publications and real-world impact

Real-World Skills | **Portfolio-Ready Projects** | **Industry Connections** | **Access to Latest AI Technology** | **Innovation Mindset** | **Better Career Opportunities**

Learn.
Build.
Apply.
Create Real Impact.

Beyond Training

From Learning to Real-World Impact.

Nirikshan AI is more than a training provider. We work with organisations to assess, plan, implement and scale AI — turning potential into measurable outcomes.

We can help organisations:

01 TRAIN

Upskill people in AI.

- Customised AI training programmes
- Role-based learning paths
- Hands-on practice with real tools
- Continuous upskilling support

02 ASSESS

Identify current AI readiness.

- Assess skills, processes and tools
- Identify strengths and gaps
- Evaluate AI opportunities
- Provide a clear roadmap

03 TRANSFORM

Identify workflows where AI can improve productivity.

- Analyse existing workflows
- Find automation opportunities
- Redesign processes with AI
- Improve efficiency and reduce manual work

04 IMPLEMENT

Build AI-powered solutions.

- Develop custom AI solutions
- Integrate AI into existing systems
- Pilot and deploy
- Provide technical support and maintenance

05 INNOVATE

Develop new AI products and applications.

- Explore new use cases
- Build AI prototypes and MVPs
- Support R&D initiatives
- Co-create industry-specific AI solutions

06 SCALE

Expand successful AI workflows across teams.

- Roll out across departments
- Standardise tools and processes
- Measure impact and ROI
- Enable long-term AI adoption

From Possibilities to Measurable Impact.

We work with you at every step — from understanding your needs to building and scaling AI solutions that create real value.

Our Ecosystem

Connecting Learners, Institutions and Industries for an AI-Ready Future

NIRIKSHAN AI
Empowering Insight with Intelligence

SCHOOLS
Build AI awareness early

- **Students** — Curiosity and future skills
- **Teachers** — AI tools for teaching
- **AI-aware schools** — Future-ready education

UNIVERSITIES & COLLEGES
From learning to real-world skills

- **Students** — Skills, projects and career growth
- **Faculty** — Research and modern teaching
- **Institutions** — Industry collaboration and innovation

INDUSTRIES
Drive productivity with AI

- **Professionals** — Workplace upskilling
- **Management** — AI-driven decision making
- **Organisations** — Transformation and growth

AI UPSKILLING
Skills, Tools, Projects and Real-World Application

10X PRODUCTIVITY
Individuals | Teams | Organisations

- **Learn** — Gain AI skills and knowledge
- **Build** — Create real projects and solutions
- **Automate** — Reduce manual work and increase efficiency

AI-READY WORKFORCE
Skilled Individuals | Innovative Teams | Future-Ready Organisations

- AI-Ready Students
- Empowered Educators
- Future-Ready Institutions
- Productive Workforce
- Stronger Industries
- A Smarter Tomorrow

A Connected Ecosystem
for a Smarter, More Productive India.

THE FUTURE IS AI-POWERED.

Are your people ready?

Nirikshan AI helps schools, universities and organisations move from:

AI Awareness
Understand possibilities.

→

AI Adoption
Start using AI in real work.

→

AI Productivity
Do more in less time.

→

AI Transformation
Build smarter, future-ready organisations.

Start your 10X journey with Nirikshan AI.
