Nirikshan AI
Pvt. Ltd.

Computer Vision Solutions

Intelligent visual monitoring for safer homes, smarter workplaces and more efficient operations.

Nirikshan AI
Pvt. Ltd.

ABOUT

Nirikshan AI Pvt. Ltd.

Nirikshan AI Pvt. Ltd. is a technology company focused on building real-world artificial intelligence and computer vision solutions. We transform cameras and visual data into intelligent systems that help people, businesses and communities stay safer, more secure and more efficient.

- AI Solutions
- Computer Vision
- Real-World Applications
- Measurable Impact

WHAT WE DO

From Visual Data to Real-World Impact

We develop AI-powered computer vision solutions that can detect, identify and understand people, objects, activities and events from images and video in real time. Our solutions are designed for homes, workplaces, industries and public spaces, helping organizations prevent risks, ensure compliance and make smarter decisions.

- Video & Image Intelligence
- Detection, Tracking & Recognition
- Safety, Security & Compliance
- Automation & Operational Efficiency
- Custom AI Solutions for Industry Needs

Our Vision

To create safer, smarter and more efficient environments using the power of artificial intelligence and computer vision.

Our Mission

To develop practical, reliable and scalable AI solutions that solve real-world problems and create measurable value for our customers and communities.

Our Approach

We work closely with industries to understand their challenges and build domain-focused computer vision solutions that deliver real impact on the ground.

Nirikshan AI
Pvt. Ltd.

WHAT IS

Computer Vision?

Computer Vision is a branch of Artificial Intelligence that enables machines to understand and interpret visual information from the real world, just like humans do. It analyzes images and video from cameras to detect people, objects, activities, and events, and turns them into meaningful insights.

HOW IT WORKS

1. CAPTURE
Cameras capture real-time video or images.

2. ANALYZE
AI models analyze visual data to identify people, objects, activities and events.

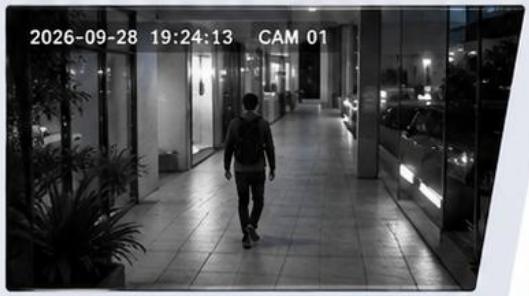

3. DETECT
The system detects predefined conditions such as intrusion, fire, PPE, or unusual activity.

4. ALERT
Instant alerts are generated when an event or risk is detected.

5. RESPOND
Insights are sent to dashboards, mobile apps, or integrated systems for quick action.

Traditional CCTV

Only records what happened

Nirikshan AI – Intelligent Vision

Understands what is happening

BENEFITS OF AI-POWERED VISUAL MONITORING

Enhanced Safety & Security
Detect risks and threats in real time.

Operational Efficiency
Automate monitoring and reduce manual effort.

Proactive Response
Get instant alerts for critical events.

Actionable Insights
Turn visual data into meaningful information.

Scalable Solutions
Works with existing cameras and adapts to different industries.

Nirikshan AI
Pvt. Ltd.

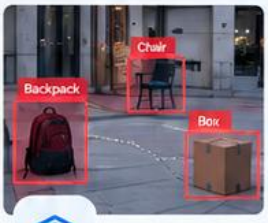

OUR

Computer Vision Ecosystem

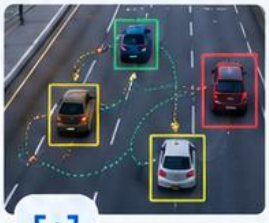

A comprehensive set of AI-powered computer vision capabilities designed to understand people, objects, activities and events from real-world video and images.

Person Detection
Detect and identify people in real time.

Object Detection
Detect and classify objects from images and video.

Object Tracking
Track people and objects across multiple frames and cameras.

Face/Identity Recognition
Recognize and verify individuals for access and security.

Activity Recognition
Understand human activities and actions in real time.

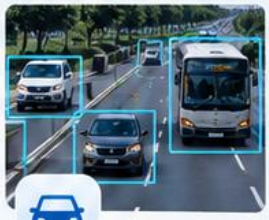

Fire & Flame Detection
Detect flames and fire events at an early stage.

Smoke Detection
Identify visible smoke in indoor and outdoor environments.

PPE Detection
Detect safety equipment such as helmets, vests, masks and more.

Vehicle Detection
Detect and classify vehicles including cars, trucks, buses and more.

Number Plate Recognition
Automatically read and identify vehicle number plates.

Zone/Boundary Detection
Monitor predefined areas and detect zone violations.

Anomaly Detection
Identify unusual or abnormal events and patterns.

Crowd & Occupancy Analytics
Count and analyze the number of people in a space.

Behavioral Monitoring
Detect specific behaviors such as mobile phone usage or restricted actions.

Safety Monitoring
Monitor workplace safety, hazard zones and compliance in real time.

Nirikshan AI
Pvt. Ltd.

PART I

SMART HOUSEHOLD &
RESIDENTIAL SOLUTIONS

5. Smart Home & Residential Security

Nirikshan AI
Pvt. Ltd.

HOUSEHOLD

Security Solutions

6.1 Intruder Detection

- Unauthorized person detection
- Restricted-area entry
- Perimeter monitoring
- Night-time intrusion detection

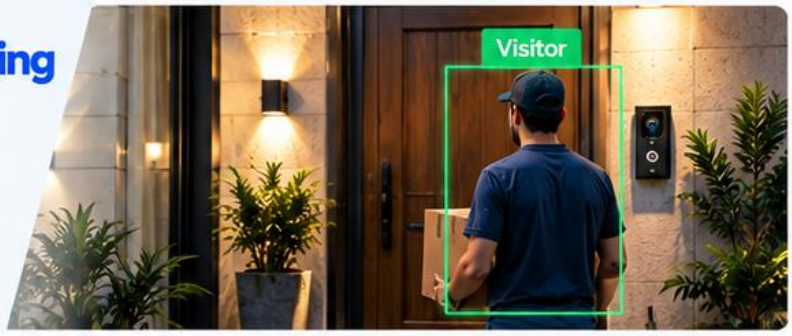

6.2 Unwanted Person Detection

- Unknown/unwanted individuals
- Restricted zones
- Suspicious presence

6.3 Door & Entrance Monitoring

- Entry/exit monitoring
- Visitor detection
- Activity around entrances

6.4 Vehicle & Parking Monitoring

- Vehicle detection
- Parking monitoring
- Entry/exit monitoring
- Unauthorized vehicle detection

Nirikshan AI
Pvt. Ltd.

HOUSEHOLD

Safety Solutions

7.1 Fire Detection

- Flame detection
- Early visual fire detection
- Real-time alerts

7.2 Smoke Detection

- Visual smoke detection
- Kitchen/garage/storage monitoring

7.3 Fall Detection

- Elderly fall detection
- Vulnerable-person monitoring
- Emergency alerts

7.4 Unusual Activity Detection

- Abnormal movement
- Unusual presence
- After-hours activity
- Restricted-area activity

Nirikshan AI
Pvt. Ltd.

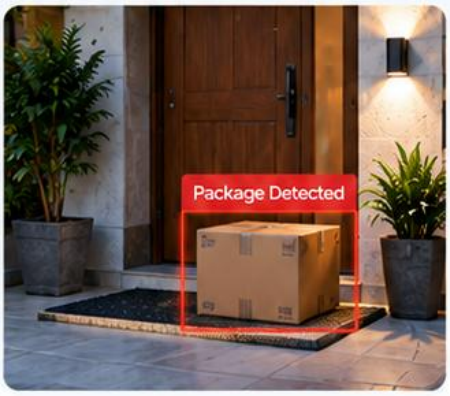

Smart Residential Monitoring

Crowd & Occupancy Detection

Package/Object Monitoring

Left-behind Object Detection

Residential Facility Monitoring

Common-area Monitoring

Apartment / Gated-community Surveillance

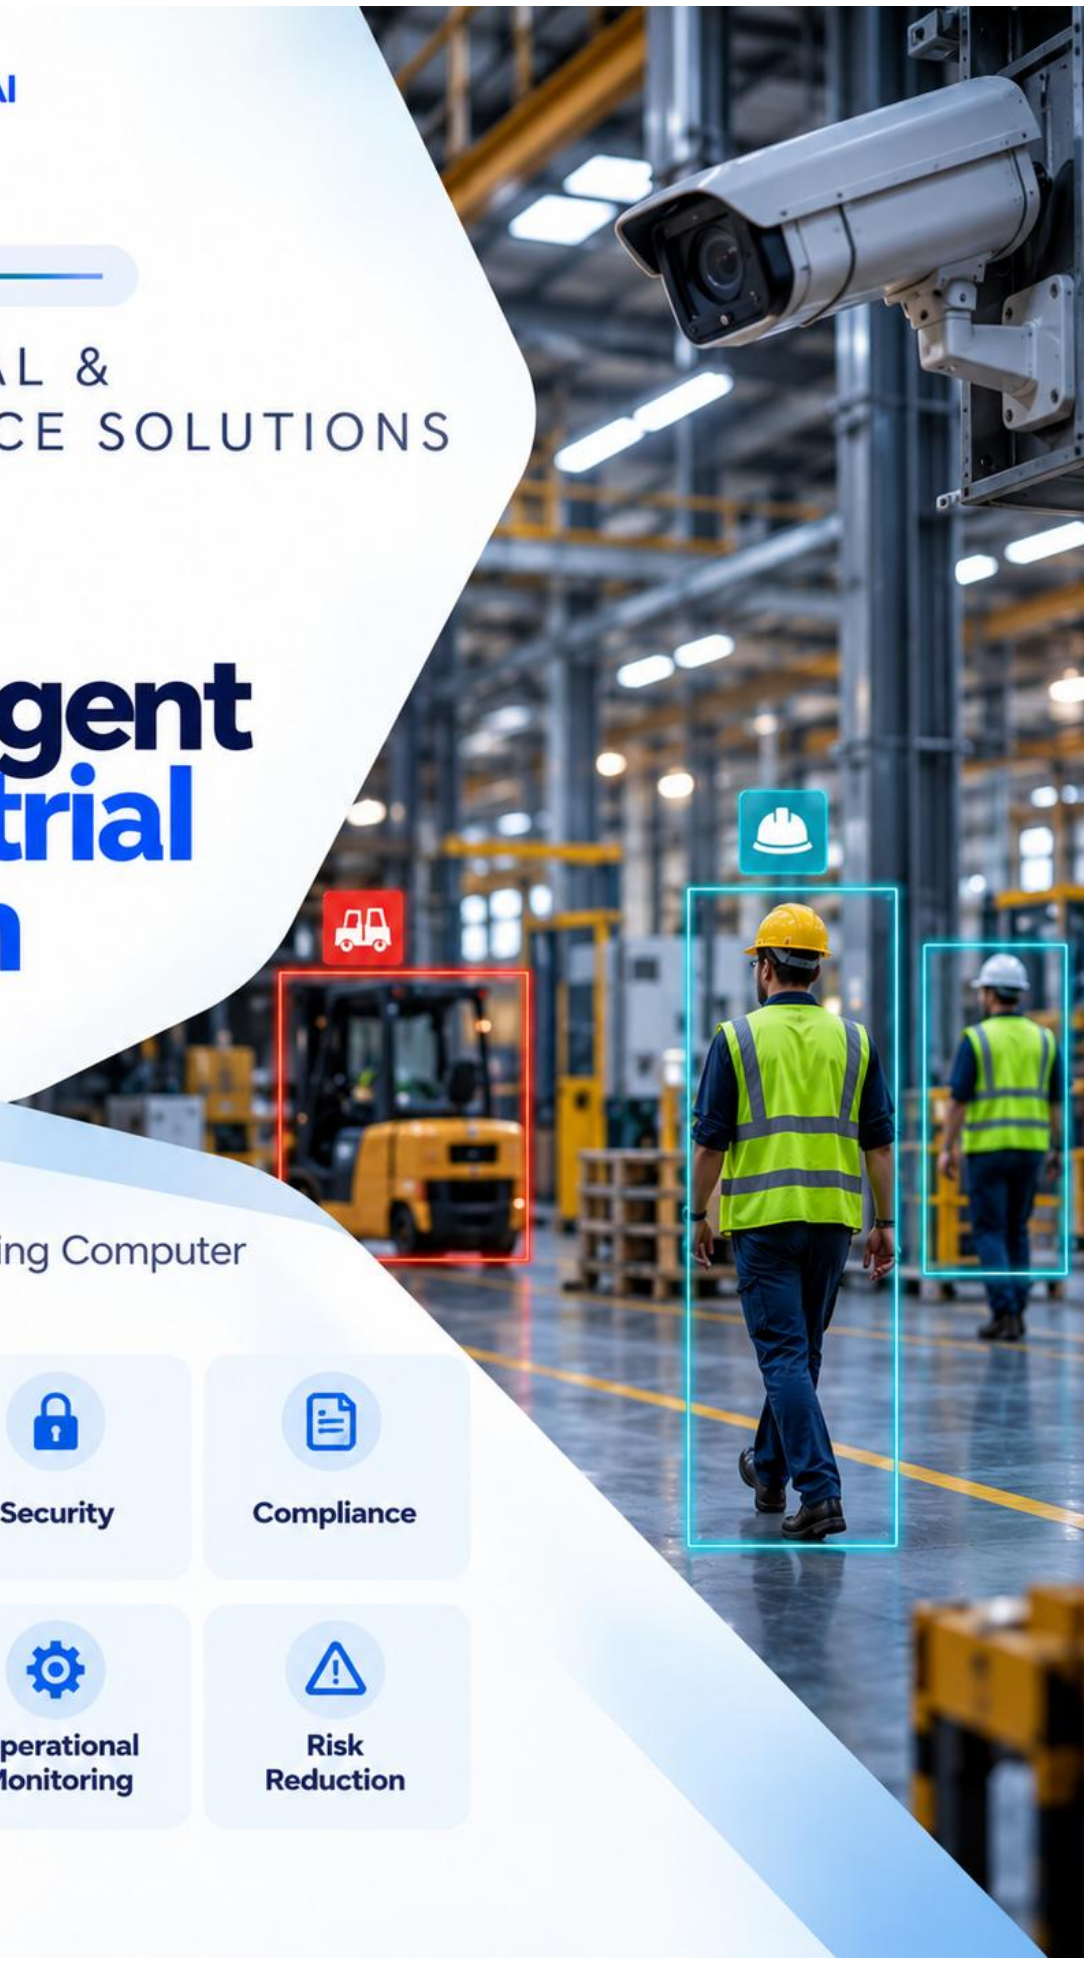

Nirikshan AI
Pvt. Ltd.

PART II

INDUSTRIAL &
WORKPLACE SOLUTIONS

9. Intelligent Industrial Vision

Introduction to using Computer Vision for:

- Workplace Safety
- Security
- Compliance
- Productivity
- Operational Monitoring
- Risk Reduction

Nirikshan AI
Pvt. Ltd.

10. Workplace Safety & PPE

10.1 PPE Detection

- Helmet
- Safety vest
- Gloves
- Goggles
- Mask
- Safety shoes
- Site-specific PPE

10.2 PPE Compliance Monitoring

- Detect missing PPE
- Identify safety violations
- Zone-based compliance
- Automated alerts

Nirikshan AI
Pvt. Ltd.

11. Fire, Smoke & Hazard Detection

11.1 Industrial Fire Detection

- Flame detection
- Fire-event detection
- Multi-camera monitoring

11.2 Smoke Detection

- Smoke identification
- High-risk area monitoring
- Early warning

11.3 Hazard Zone Monitoring

- Dangerous-area intrusion
- Restricted-zone entry
- Safety boundary violations

12. Employee & Workplace Behavior Monitoring

Nirikshan AI
Pvt. Ltd.

12. Employee & Workplace Behavior Monitoring

12.1 Mobile Phone Usage Detection

- Unauthorized phone usage
- Restricted-area monitoring

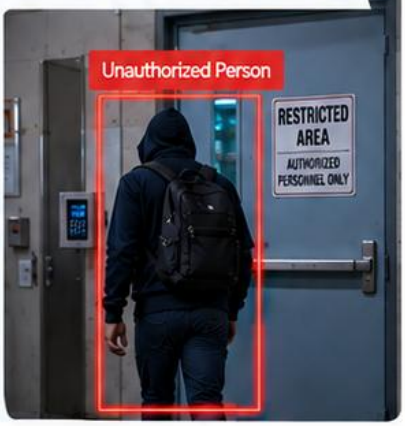

12.2 Unsafe Behavior Detection

- Unsafe activities
- Safety violations
- Prohibited actions

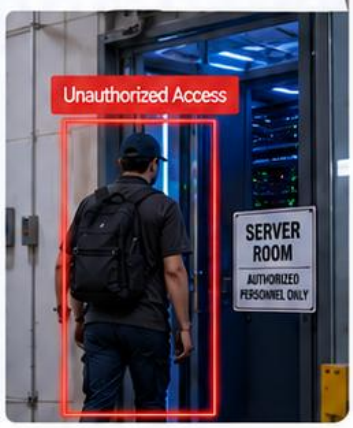

12.3 Unauthorized Person Detection

- Unknown personnel
- Restricted-area presence
- Unauthorized movement

12.4 Unauthorized Access Detection

- Restricted rooms
- Server/control rooms
- Laboratories
- Production areas

13. Worker & Machinery Safety

Nirikshan AI
Pvt. Ltd.

13. Worker & Machinery Safety

13.1 Worker–Equipment Proximity Detection

- Person + machinery proximity
- Forklift/person proximity
- Hazard-zone monitoring

13.2 Worker Fall Detection

- Fall identification
- Accident detection
- Emergency alerts

13.3 Machinery/Operational Zone Monitoring

- Restricted machinery zones
- Robotic cells
- Heavy equipment areas

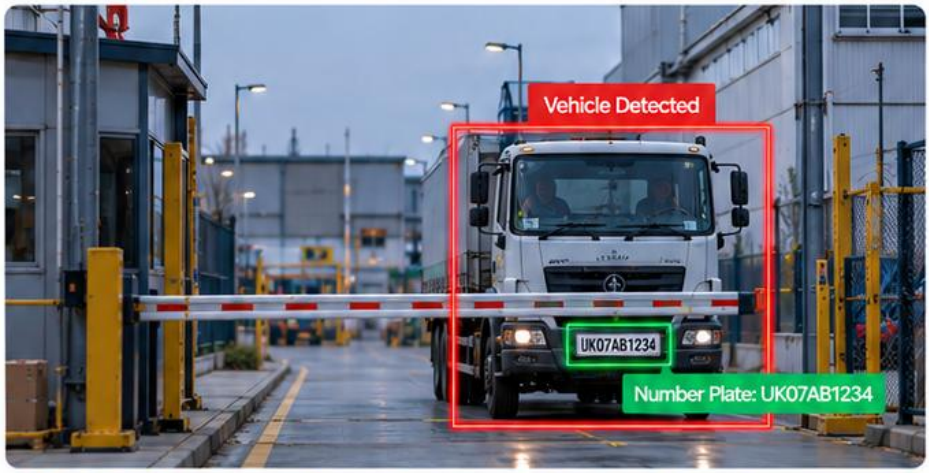

Nirikshan AI
Pvt. Ltd.

14. Industrial Vehicle & Traffic Intelligence

- Vehicle detection
- Forklift detection
- Vehicle tracking
- Number plate recognition
- Parking monitoring
- Industrial traffic monitoring
- Vehicle/person proximity
- Restricted vehicle access

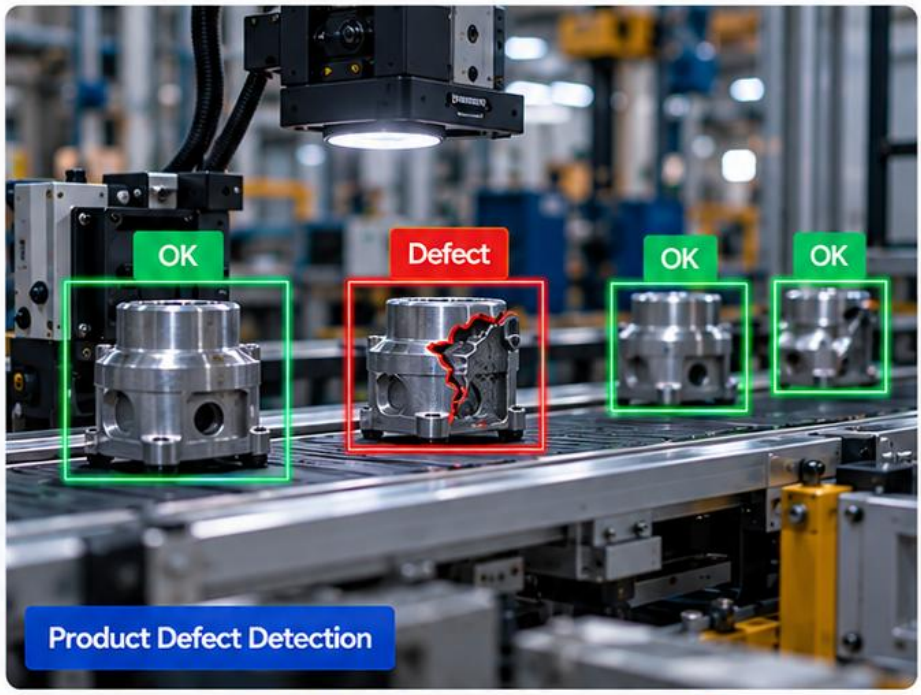

Nirikshan AI
Pvt. Ltd.

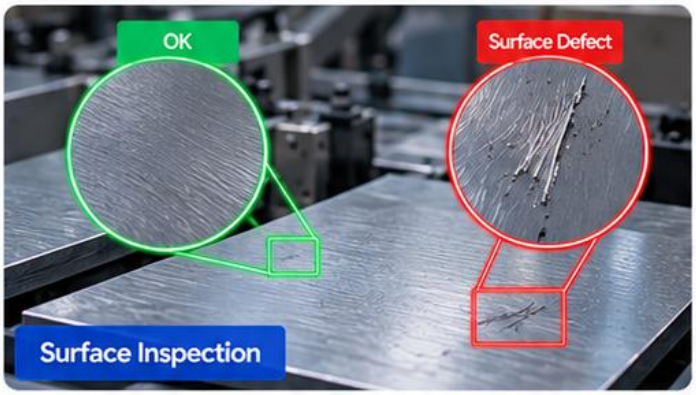

15. Quality Inspection & Manufacturing

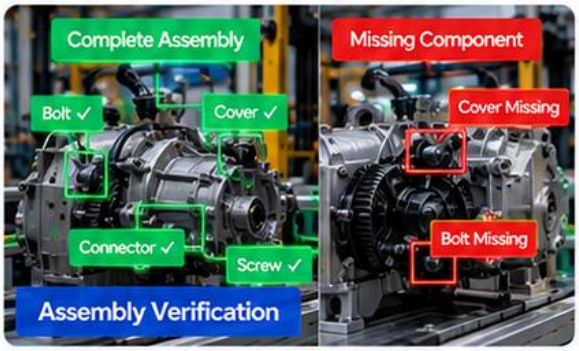

PART III — ADVANCED COMPUTER VISION

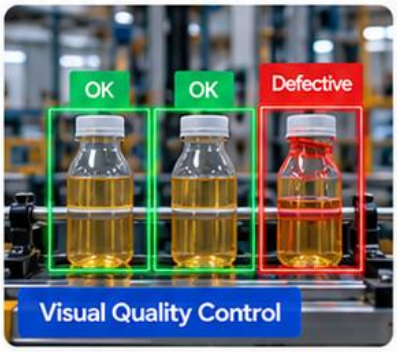

- Product defect detection
- Surface inspection
- Packaging inspection
- Assembly verification
- Visual quality control
- Production-line monitoring

Nirikshan AI
Pvt. Ltd.

16. Object Detection & Tracking

PART III — ADVANCED COMPUTER VISION

- People
- Vehicles
- Products
- Machinery
- Equipment
- Materials
- Custom objects

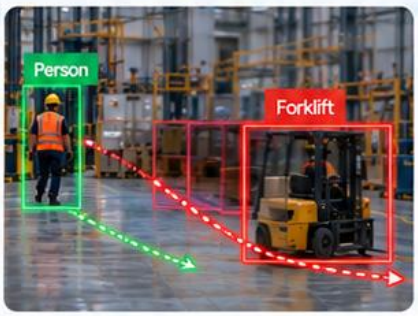

1 Detection
Identify and classify objects in real time

2 Tracking
Track movement across frames

3 Analytics
Generate insights from tracked objects

Nirikshan AI
Pvt. Ltd.

17. Anomaly & Activity Detection

PART III — ADVANCED COMPUTER VISION

- Unusual activity
- Abnormal movement
- Operational deviations
- Suspicious events
- Custom anomaly detection
- Event-based alerts

Unusual Activity

Detect unauthorized or unusual activities in restricted areas.

Abnormal Movement

Identify abnormal speed, erratic movement or irregular patterns.

Operational Deviations

Detect operational deviations in production processes.

Suspicious Events

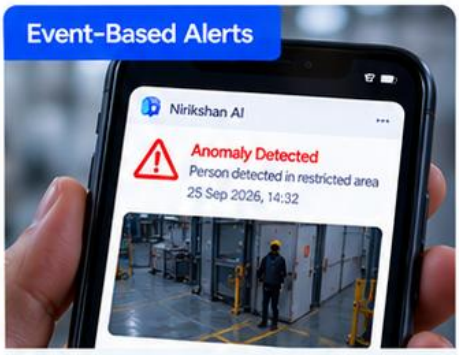

Identify suspicious events and potential security threats.

Custom Anomaly Detection

Create custom rules for zone breach, area intrusion or specific events.

Event-Based Alerts

Get real-time alerts via app, email or dashboard.

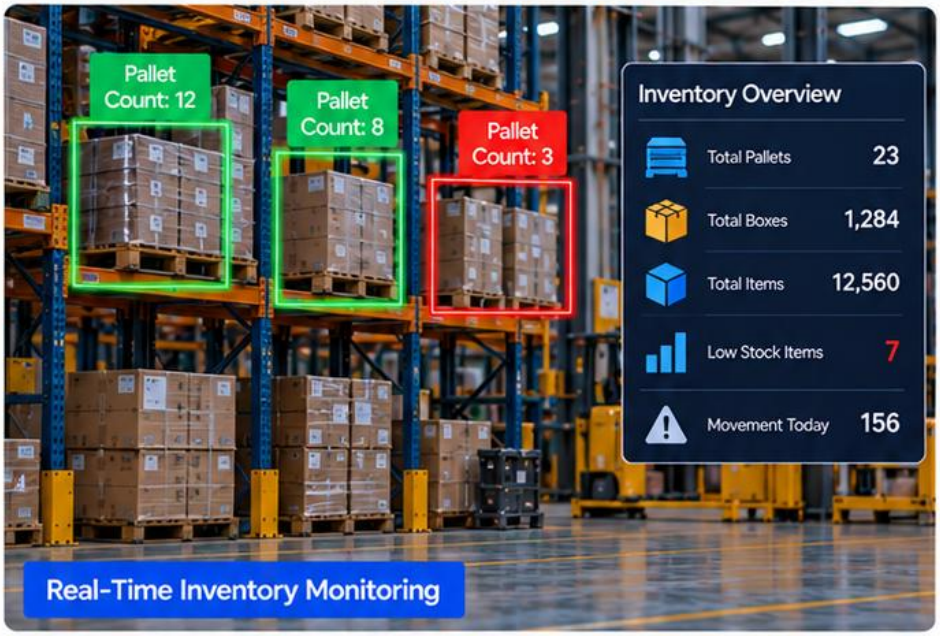

Nirikshan AI
Pvt. Ltd.

18. Inventory & Material Monitoring

PART III — ADVANCED COMPUTER VISION

- Object counting
- Product counting
- Material identification
- Inventory visibility
- Asset monitoring
- Movement tracking

Object Counting

Automatically count objects in real time.

Product Counting

Count finished products on production lines.

Material Identification

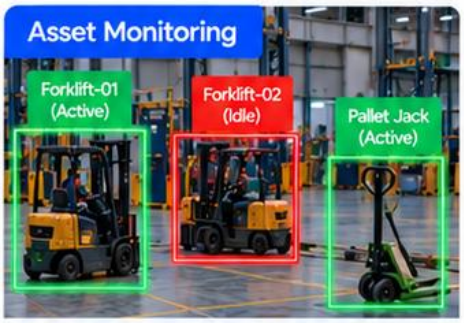

Identify and classify different materials automatically.

Inventory Visibility

Real-time visibility of inventory levels across locations.

Asset Monitoring

Monitor and track valuable assets equipment in real time.

Movement Tracking

Track movement of materials across different zones.

Nirikshan AI
Pvt. Ltd.

PART IV — PLATFORRM & DEPLOYMENT

19. How Nirikshan AI Vision Works

FROM VIDEO INPUT TO REAL-WORLD ACTION

1 Camera / CCTV
IP Cameras, CCTV, Drones or other video sources

2 Video/Image Input
Real-time video stream or recorded images

3 AI Computer Vision Engine
Advanced AI models process video frames in real time

4 Detection & Analysis
Identify people, vehicles, objects and activities

5 Event / Violation Identified
Detect safety violations, unauthorized access, unsafe behavior or abnormal events

6 Alert / Dashboard / Action
Real-time alerts, dashboard notifications and automated actions

Nirikshan AI
Pvt. Ltd.

PART IV — PLATFORRM & DEPLOYMENT

20. Intelligent Alerting & Monitoring

REAL-TIME INSIGHTS FOR A SAFER, SMARTER ENVIRONMENT

Real-time alerts
Instant detection and notifications

Event notifications
App, email and SMS alerts

Dashboard monitoring
Live view and insights

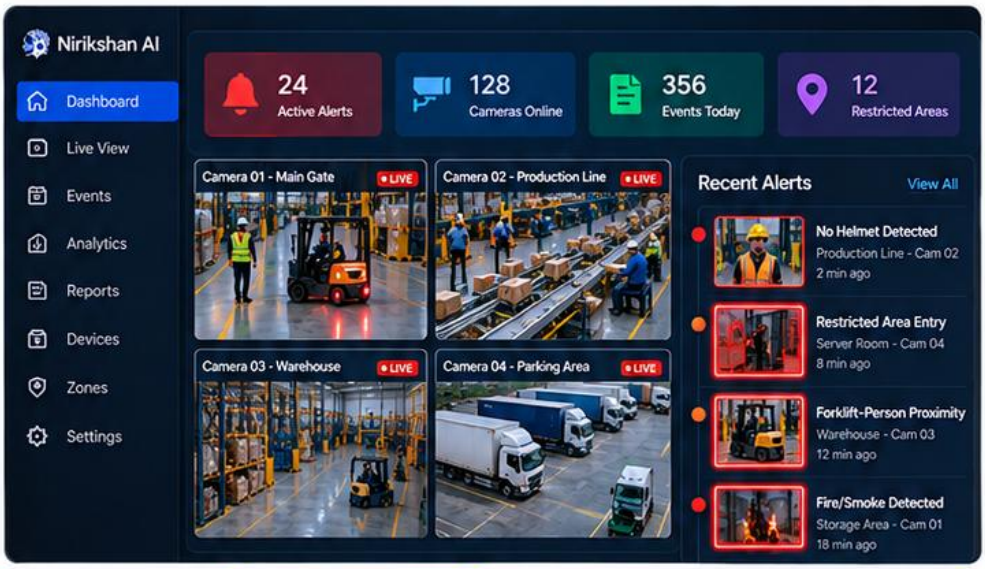

Multi-camera monitoring
Monitor multiple locations simultaneously

Zone-based alerts
Custom zones and restricted areas

Incident history
Past events with video evidence

Event logging
Detailed logs of all events

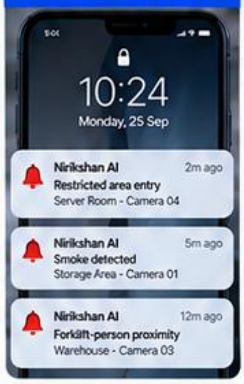

Reporting & analytics
Insights for better decisions

Real-time Alerts

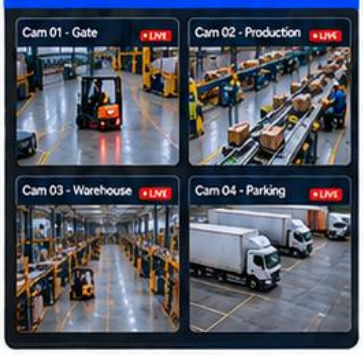

Event Notifications

Dashboard Monitoring

Multi-Camera Monitoring

Zone-Based Alerts

Incident History

Time	Event	Camera
10:24 AM	No Helmet	Cam 02
10:18 AM	Restricted Entry	Cam 04
10:12 AM	Forklift Proximity	Cam 03
09:56 AM	Smoke Detected	Cam 01
09:42 AM	Unusual Activity	Cam 05
09:30 AM	Object Count Alert	Cam 03

Reporting & Analytics

Total Events	Safety Violations	Intrusion Events	Fire/Smoke
1,245	356	98	24
↑ 12%	↑ 8%	↓ 5%	↑ 20%

Nirikshan AI
Pvt. Ltd.

PART IV — PLATFORRM & DEPLOYMENT

21. Deployment Options

FLEXIBLE DEPLOYMENT FOR YOUR INFRICSTRUCTURE

Existing CCTV Infrastructure

- Works with your current analog/IP CCTV
- No need to replace existing cameras
- Cost-effective integration

IP Cameras

- Supports major IP camera brands
- RTSP, ONVIF support
- High-resolution video processing
- Real-time analytics

Edge Devices

- On-site AI processing
- Low latency
- Works in low bandwidth areas
- Supports industrial grade devices

On-Premise Systems

- Complete local deployment
- Full data control
- Suitable for sensitive environments
- Integrates with existing IT systems

Cloud Infrastructure

- Scalable and flexible
- Remote access anywhere
- Automatic updaties
- Low infrastructure management

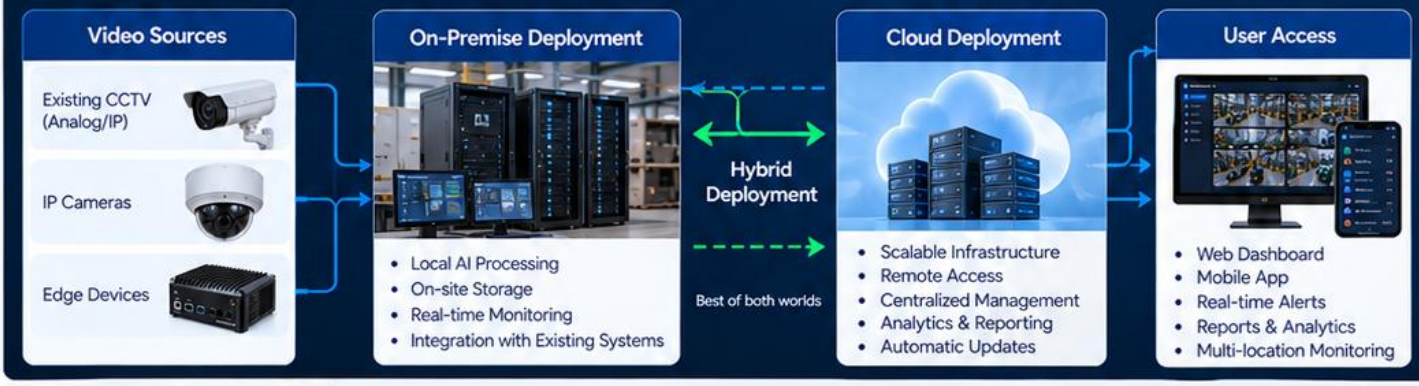

Hybrid Deployments

- Combine on-premise and cloud
- Process sensitive data locally
- Use cloud for analytics & storage
- Flexible and future-ready

Flexible Architecture

Nirikshan AI can be deployed in the way that best fits your organization's infrastructure and security requirements.

Deployment Scenarios

A. On-Premise (Local Deployment)

- Suitable for high-security environments
- No data leaves your premises
- Full control over infrastructure and data
- Integrates with existing IT systems

B. Cloud Deployment

- Remote Access
- Scalable & Flexible
- Automatic Updates
- Reduced Infrastructure Management

C. Hybrid Deployment

- Process sensitive data locally
- Use cloud for advanced analytics
- Lower bandwidth usage
- High reliability and scalability

Nirikshan AI
Pvt. Ltd.

PART IV — PLATFORRM & DEPLOYMENT

22. Industry Applications

AI VISION SOLUTIONS ACROSS MULTIPLE INDUSTRIES

Residential

- Entry/exit monitoring
- Visitor management
- Safety & security
- Unauthorized access alerts

Manufacturing

- Worker safety monitoring
- Machine operation monitoring
- Quality inspection
- Production line analytics

Construction

- PPE compliance
- Hazard zone monitoring
- Equipment monitoring
- Site safety analytics

Warehousing

- Inventory & material tracking
- Forklift safety
- Zone monitoring
- Movement analytics

Logistics

- Vehicle tracking
- Dock management
- Package & pallet tracking
- Entry/exit monitoring

Mining

- Equipment monitoring
- Worker safety
- Restricted area alerts
- Operational analytics

Retail

- Customer behavior analysis
- Theft & fraud detection
- Queue monitoring
- Store analytics

Offices

- Access control
- Visitor management
- Occupancy analytics
- Workplace safety

Hospitals

- Patient & staff safety
- Restricted area monitoring
- Crowd management
- Emergency alerts

Hotels

- Visitor monitoring
- Guest experience analytics
- Staff safety
- Access control

Educational Campuses

- Campus security
- Safety & incident detection
- Crowd monitoring
- Access management

Industrial Facilities

- Process monitoring
- Safety compliance
- Equipment surveillance
- Anomaly detection

Parking & Infrastructure

- Vehicle detection & tracking
- Number plate recognition
- Parking space monitoring
- Traffic flow analysis

One Platform. Multiple Industries.

- Customizable for industry-specific needs
- Scalable from small sites to large enterprises
- Works with existing infrastructure
- Real-time insights and alerts
- Improves safety, efficiency and security

Nirikshan AI
Pvt. Ltd.

PART IV — PLATFORRM & DEPLOYMENT

23. Why Nirikshan AI

ADVANCED VISION INTELLIGENCE FOR REAL-WORLD IMPACT

AI-Powered Visual Intelligence

Advanced AI models to understand real-world scenarios with high accuracy.

Custom Computer Vision Models

Tailored AI models for your specific use cases and environments.

Industry-Specific Solutions

Domain-focused solutions for manufacturing, construction, retail, logistics, healthcare and more.

Existing-Camera Integration

Works with your current CCTV/IP camera infrastructure — no need for costly replacements.

Real-Time Monitoring

Instant detection, analysis and alerts for faster response.

Scalable Architecture

Built to scale from a few cameras to thousands across multiple locations.

Custom Detection Capabilities

Detect people, vehicles, PPE violations, fire/smoke, unusual activity and custom objects.

Actionable Alerts

Real-time notifications via dashboard, mobile app, email or SMS for quick decision making.

Multi-Camera Support

Monitor and manage multiple locations and cameras from a single platform.

Data-Driven Operational Insights

Detailed analytics, reports and trends to improve safety, efficiency and operational performance.

The Nirikshan AI Advantage

SMARTER MONITORING. SAFER OPERATIONS. HIGHER EFFICIENCY.

Enhanced Safety & Security

Reduce risks, prevent incidents and create safer environments.

Improved Operational Efficiency

Automate monitoring and get real-time insights to optimize operations.

Cost-Effective Solution

Maximize value by leveraging existing infrastructure and scalable technology.

Future-Ready Technology

Continuous innovation with custom AI models and advanced analytics.

Nirikshan AI
Pvt. Ltd.

PART IV — PLATFORRM & DEPLOYMENT

24. Custom Computer Vision Solutions

TAILORED AI SOLUTIONS FOR YOUR UNIQUE BUSINESS NEEDS

Have a problem that isn't listed?

Nirikshan AI can develop Computer Vision solutions for specific business requirements. We understand your challenges, design custom AI models, and deploy end-to-end solutions tailored to your operations.

- Your Problem
- Our Expertise
- Custom AI Solution
- Real-World Impact

Our Solution Development Process

FROM REQUIREMENTS TO REAL-WORLD IMPACT

1. **Requirement** — Understand your business problem, use cases and success criteria.
2. **Dataset** — Collect and prepare relevant image/video data (your data or public data).
3. **Model Development** — Build and train custom Computer Vision models for your specific use case.
4. **Testing** — Validate accuracy, robustness and performance in real scenarios.
5. **Deployment** — Deploy on cloud, on-premise or edge devices — as per your needs.
6. **Monitoring** — Continuous monitoring, model improvement and ongoing support.

Example Custom Solutions

INDUSTRY-FOCUSED. PROBLEM-SPECIFIC. RESULTS-DRIVEN.

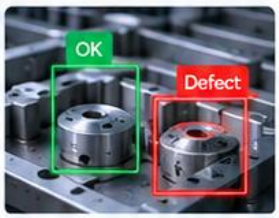

Custom Object Detection

- Detect custom objects unique to your business
- Vehicles, equipment, products or tools
- High-accuracy detection in real time

Custom Safety Rules

- Detect PPE violations
- Enforce site-specific safety rules
- Alert on unsafe behavior
- Custom rule logic for your environment

Custom Industrial Inspection

- Detect product defects
- Surface inspection
- Assembly verification
- Packaging inspection
- Quality control for manufacturing lines

Custom Activity Detection

- Detect specific activities
- Unauthorized access
- Restricted area monitoring
- Behavior analysis
- Custom activity rules for your site

Custom Anomaly Detection

- Identify unusual patterns
- Detect abnormal movement
- Operational deviations
- Early warning alerts
- Custom anomaly logic for critical environments

Let's Build Your Custom AI Solution

Share your requirements with our team and we will design a Computer Vision solution that fits your exact business needs.

Discuss Your Needs → Get a Solution Plan → Start Development → See Real Results

Nirikshan AI
Pvt. Ltd.

PART IV — PLATFORRM & DEPLOYMENT

25. Solution Comparison / Capability Matrix

ONE PLATFORM. MULTIPLE SOLUTIONS. ACROSS ALL ENVIRONMENTS.

Solution / Feature	Residential	Industrial	Commercial	Real-Time Alerts
Intruder Detection	✓	✓	✓	✓
Fire Detection	✓	✓	✓	✓
Smoke Detection	✓	✓	✓	✓
PPE Detection	—	✓	✓	✓
Phone Detection	—	✓	✓	✓
Vehicle Detection	✓	✓	✓	✓
Fall Detection	✓	✓	✓	✓
Object Tracking	✓	✓	✓	✓
Anomaly Detection	✓	✓	✓	✓

Visual Examples

SAME POWERFUL AI SOLUTIONS. DIFFERENT ENVIRONMENTS.

Intruder Detection

Fire & Smoke Detection

PPE Detection

Phone Detection

Vehicle Detection

Fall Detection

Object Tracking

Anomaly Detection

Key Benefits

- Unified platform for multiple environments
- Wide range of AI-powered solutions
- Real-time alerts for faster response
- Customizable as per industry needs
- Scalable from single site to multi-location
- Works with existing camera infrastructure

Nirikshan AI
Pvt. Ltd.

PART IV — PLATFORRM & DEPLOYMENT

26. Final Value Proposition

FROM CAMERAS TO INTELLIGENCE

Traditional Cameras

SHOW YOU WHAT HAPPENED

- Only records video
- Requires manual monitoring
- No real-time alerts
- Difficult to find important events
- Reactive approach
- Limited operational value

Nirikshan AI Computer Vision

HELPS YOU DETECT WHAT IS HAPPENING, UNDERSTAND THE EVENT, AND RESPOND FASTER.

- Real-time detection and alerts
- AI-powered event understanding
- Proactive and faster response
- Works with your existing cameras
- Custom solutions for your business
- Actionable insights and analytics

Enhanced Safety & Security
Detect risks and prevent incidents before they escalate.

Improved Operational Efficiency
Automate monitoring and reduce manual work.

Data-Driven Decisions
Get actionable insights to optimize your operations.

Cost Effective
Maximize value with your existing camera infrastructure.

Scalable Across Locations
From single site to multi-site deployments.

Customizable Solutions
Tailored to your industry and specific needs.

From Cameras to Intelligence

Traditional cameras show you what happened.
Nirikshan AI Computer Vision helps you detect what is happening, understand the event, and respond faster.

Detect
Identify people, vehicles, objects and events.

→

Understand
AI models analyze the event in real-time.

→

Respond
Get instant alerts and take action faster.

- Real-Time Monitoring
- Safer Environments
- Higher Efficiency
- Smarter Operations

Nirikshan AI
Pvt. Ltd.
