NIRIKSHANAI

SOCIAL MEDIA MONITORING &
GOVERNANCE INTELLIGENCE PLATFORM

The Challenge

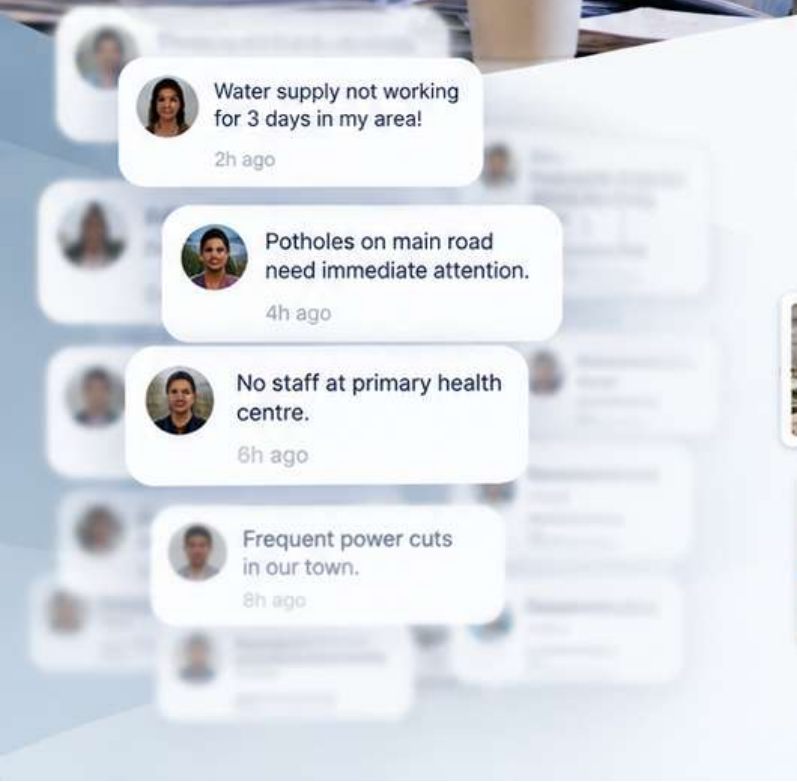

Public feedback is **scattered** across social media, news, YouTube and the open web.

Important complaints can be buried among thousands of conversations.

Manual monitoring is slow and difficult to scale.

District-level issues need faster identification and routing.

The Solution

A unified platform that brings together public conversations from social media, news, YouTube and the open web — and converts them into actionable intelligence for faster, more effective and transparent governance.

Unified Conversations
Social media, news, YouTube and web in one place.

AI-Powered Analysis
Sentiment, topics, locations and trends.

Nationwide Intelligence
Insights across all states and districts.

Actionable Workflows
Prioritise, assign, respond and track.

Evidence-Based Governance
Reports and historical analysis for better decisions.

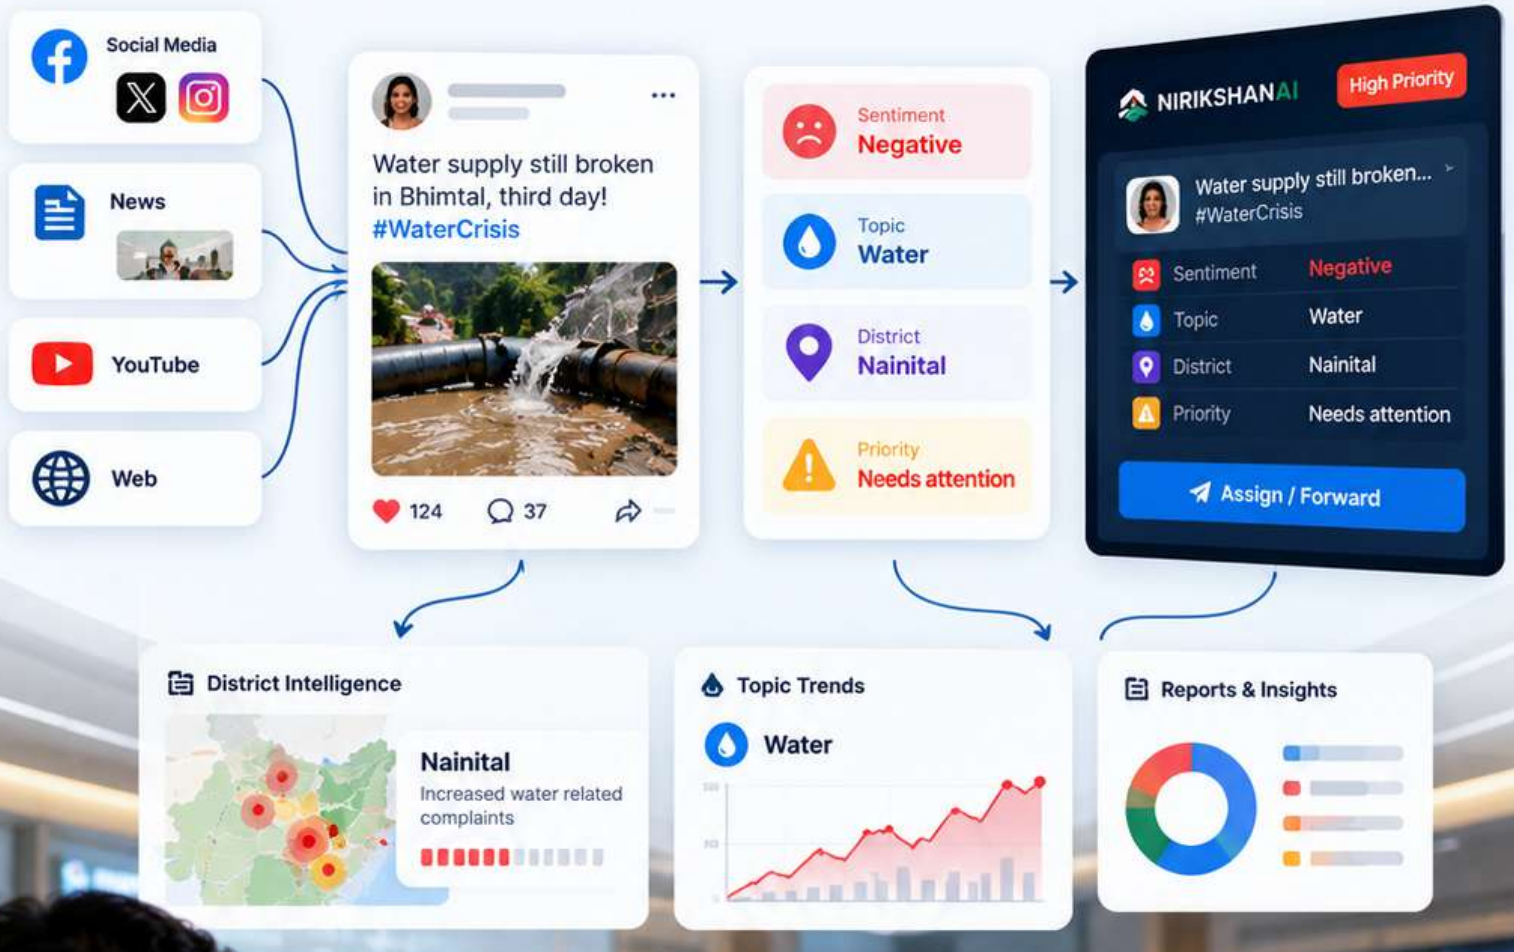

How It Works

COLLECT → ANALYZE → UNDERSTAND → PRIORITIZE → RESPOND → MEASURE

Core Intelligence Capabilities

Social Media Intelligence

Facebook-style, X-style and Instagram-style environments with posts, comments, likes, images and real-time interaction.

Sentiment Intelligence

Automatically classifies conversations as:

- Positive
- Neutral
- Negative

District Intelligence

Maps conversations across **all districts**, including recognition of local town/place references.

Governance Intelligence

Classifies conversations across:

- Infrastructure
- Healthcare
- Education
- Environment
- Migration
- Jobs
- Water
- Power
- Corruption
- Tourism
- Economic

Trend & Virality Intelligence

Identify trending hashtags, emerging issues, engagement patterns and topic sentiment.

Uttarakhand Intel Center

One intelligence center. Multiple information sources.
One operational picture.

English & Hindi Searches

AI-Powered Article Analysis

District Heatmaps
Real-time view of issue concentration across all 13 districts.

Entity Intelligence
Identifies key people, places, departments and organizations.

Alerts
Real-time alerts for emerging and high-priority issues.

Historical Scan Comparison
Compare conversations and trends over time.

AI-Powered Insights
Automated analysis of articles, posts and search results.

Command & Response

From public conversations to faster, more accountable action.

A real-time governatine response room that helps authorities monitor, analyse and act on citizen issues across all districts from a single dashboard.

Unified Inbox
All sources in one place.

Live Monitor
Real-time conversations as they happen.

Auto-Monitoring
Continuous tracking across platforms.

Keyword Watchlists
Track specific keywords and hashtags.

Priority Queue
Identify and act on high-priority issues.

District Forwarding
Assign and forward to the right district officials.

Canned Responses
Use predefined, approved responses.

Reports & PDF Export
Generate detailed reports with analytics.

AI Configuration
Customize detection, classification and alerts.

Team Management
Roles, access and collaboration.

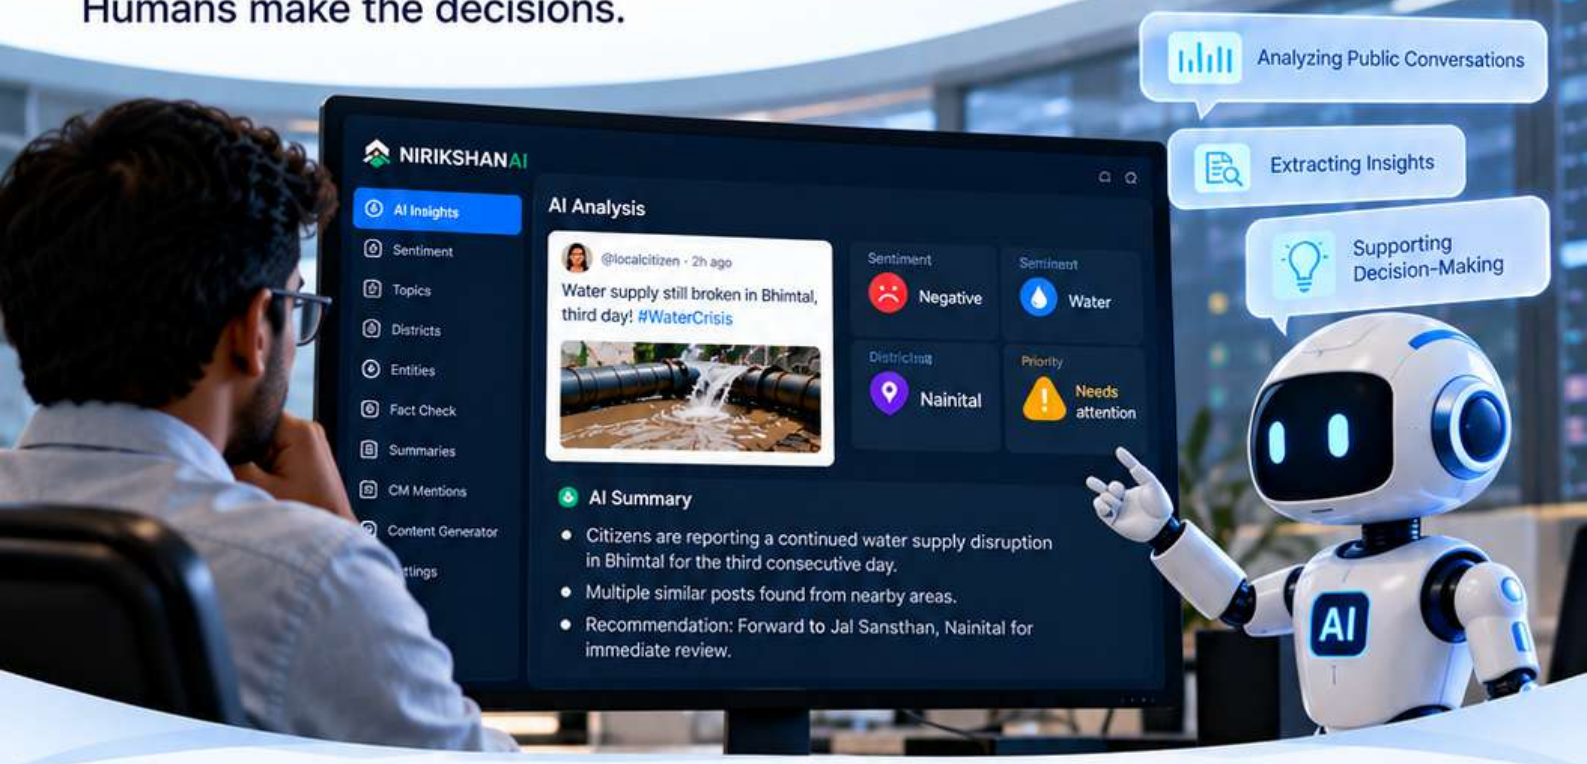

Live Broadcasting
Share important updates with multiple districts.

25+ Dashboard Sections
Comprehensive tools for end-to-end governance intelligence.

AI-Powered Governance

NirikshanAI uses AI to process large volumes of public conversations, extract meaningful insights and support faster, more informed decision-making for government departments.

AI reads the volume. Humans make the decisions.

Sentiment Classification

Automatically classifies conversations as Positive, Neutral or Negative.

Positive	42%
Neutral	28%
Negative	30%

Topic Classification

Identifies key topics from public conversations.

Water	28%
Roads	18%
Healthcare	15%
Education	12%

District Detection

Detects district names and local place references.

Social Content Generation

Generates department communication content drafts for social media.

Fact-Check Analysis

Helps verify claims using trusted sources and available information.

Likely True

Entity Extraction

Identifies key people, places, departments and organizations.

- Bhimtal
- Jal Sansthan
- Uttarakhand Govt.
- CM Pushkar Singh Dhami

CM-Mention Detection

Detects and flags mentions of the Chief Minister.

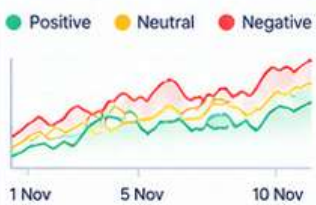

@citizen · 5h ago

Sir @pushkardhami please look into the water problem in Bhimtal.

CM Mention Detected

Public-Reaction Analysis

Analyzes public response patterns for specific issues, policies or events.

Article Summarization

Summarizes long news articles into key points for quicker review.

Business / Government Value

Turning public conversations into faster, more informed and more effective governance.

01
Faster Response

Identify issues as conversations emerge.

02
Wider Coverage

Bring social media, news, YouTube and web intelligence into one workspace.

03
District-Level Visibility

Understand where issues are concentrated.

04
Evidence-Based Monitoring

Historical scans allow trends to be measured over time.

05
Operational Workflow

Move from detection to prioritization, response and reporting.

- Detect
- Prioritize
- Respond
- Report

Key Outcomes

- **Faster** issue resolution
- **More informed** decision-making
- **Greater** public accountability
- **Stronger** governance outcomes

From Insight to Impact

Detection
Identify emerging issues from multiple sources in real time.

→

Prioritization
Use AI and district intelligence to highlight high-priority issues.

→

Response
Route to the right department with context and evidence.

→

Reporting
Track resolution and measure impact with detailed reports.

Deployment Roadmap

A working platform that is already deployable and ready for government use.

Current Platform

Live & Operational

Social monitoring environment
Track conversations from multiple sources in real time.

AI classification
Sentiment, topic and district detection using AI.

Dashboard intelligence
Real-time insights and analytics for faster decision-making.

Uttarakhand Intel Center
Integrated view of social media, news, YouTube and web intelligence.

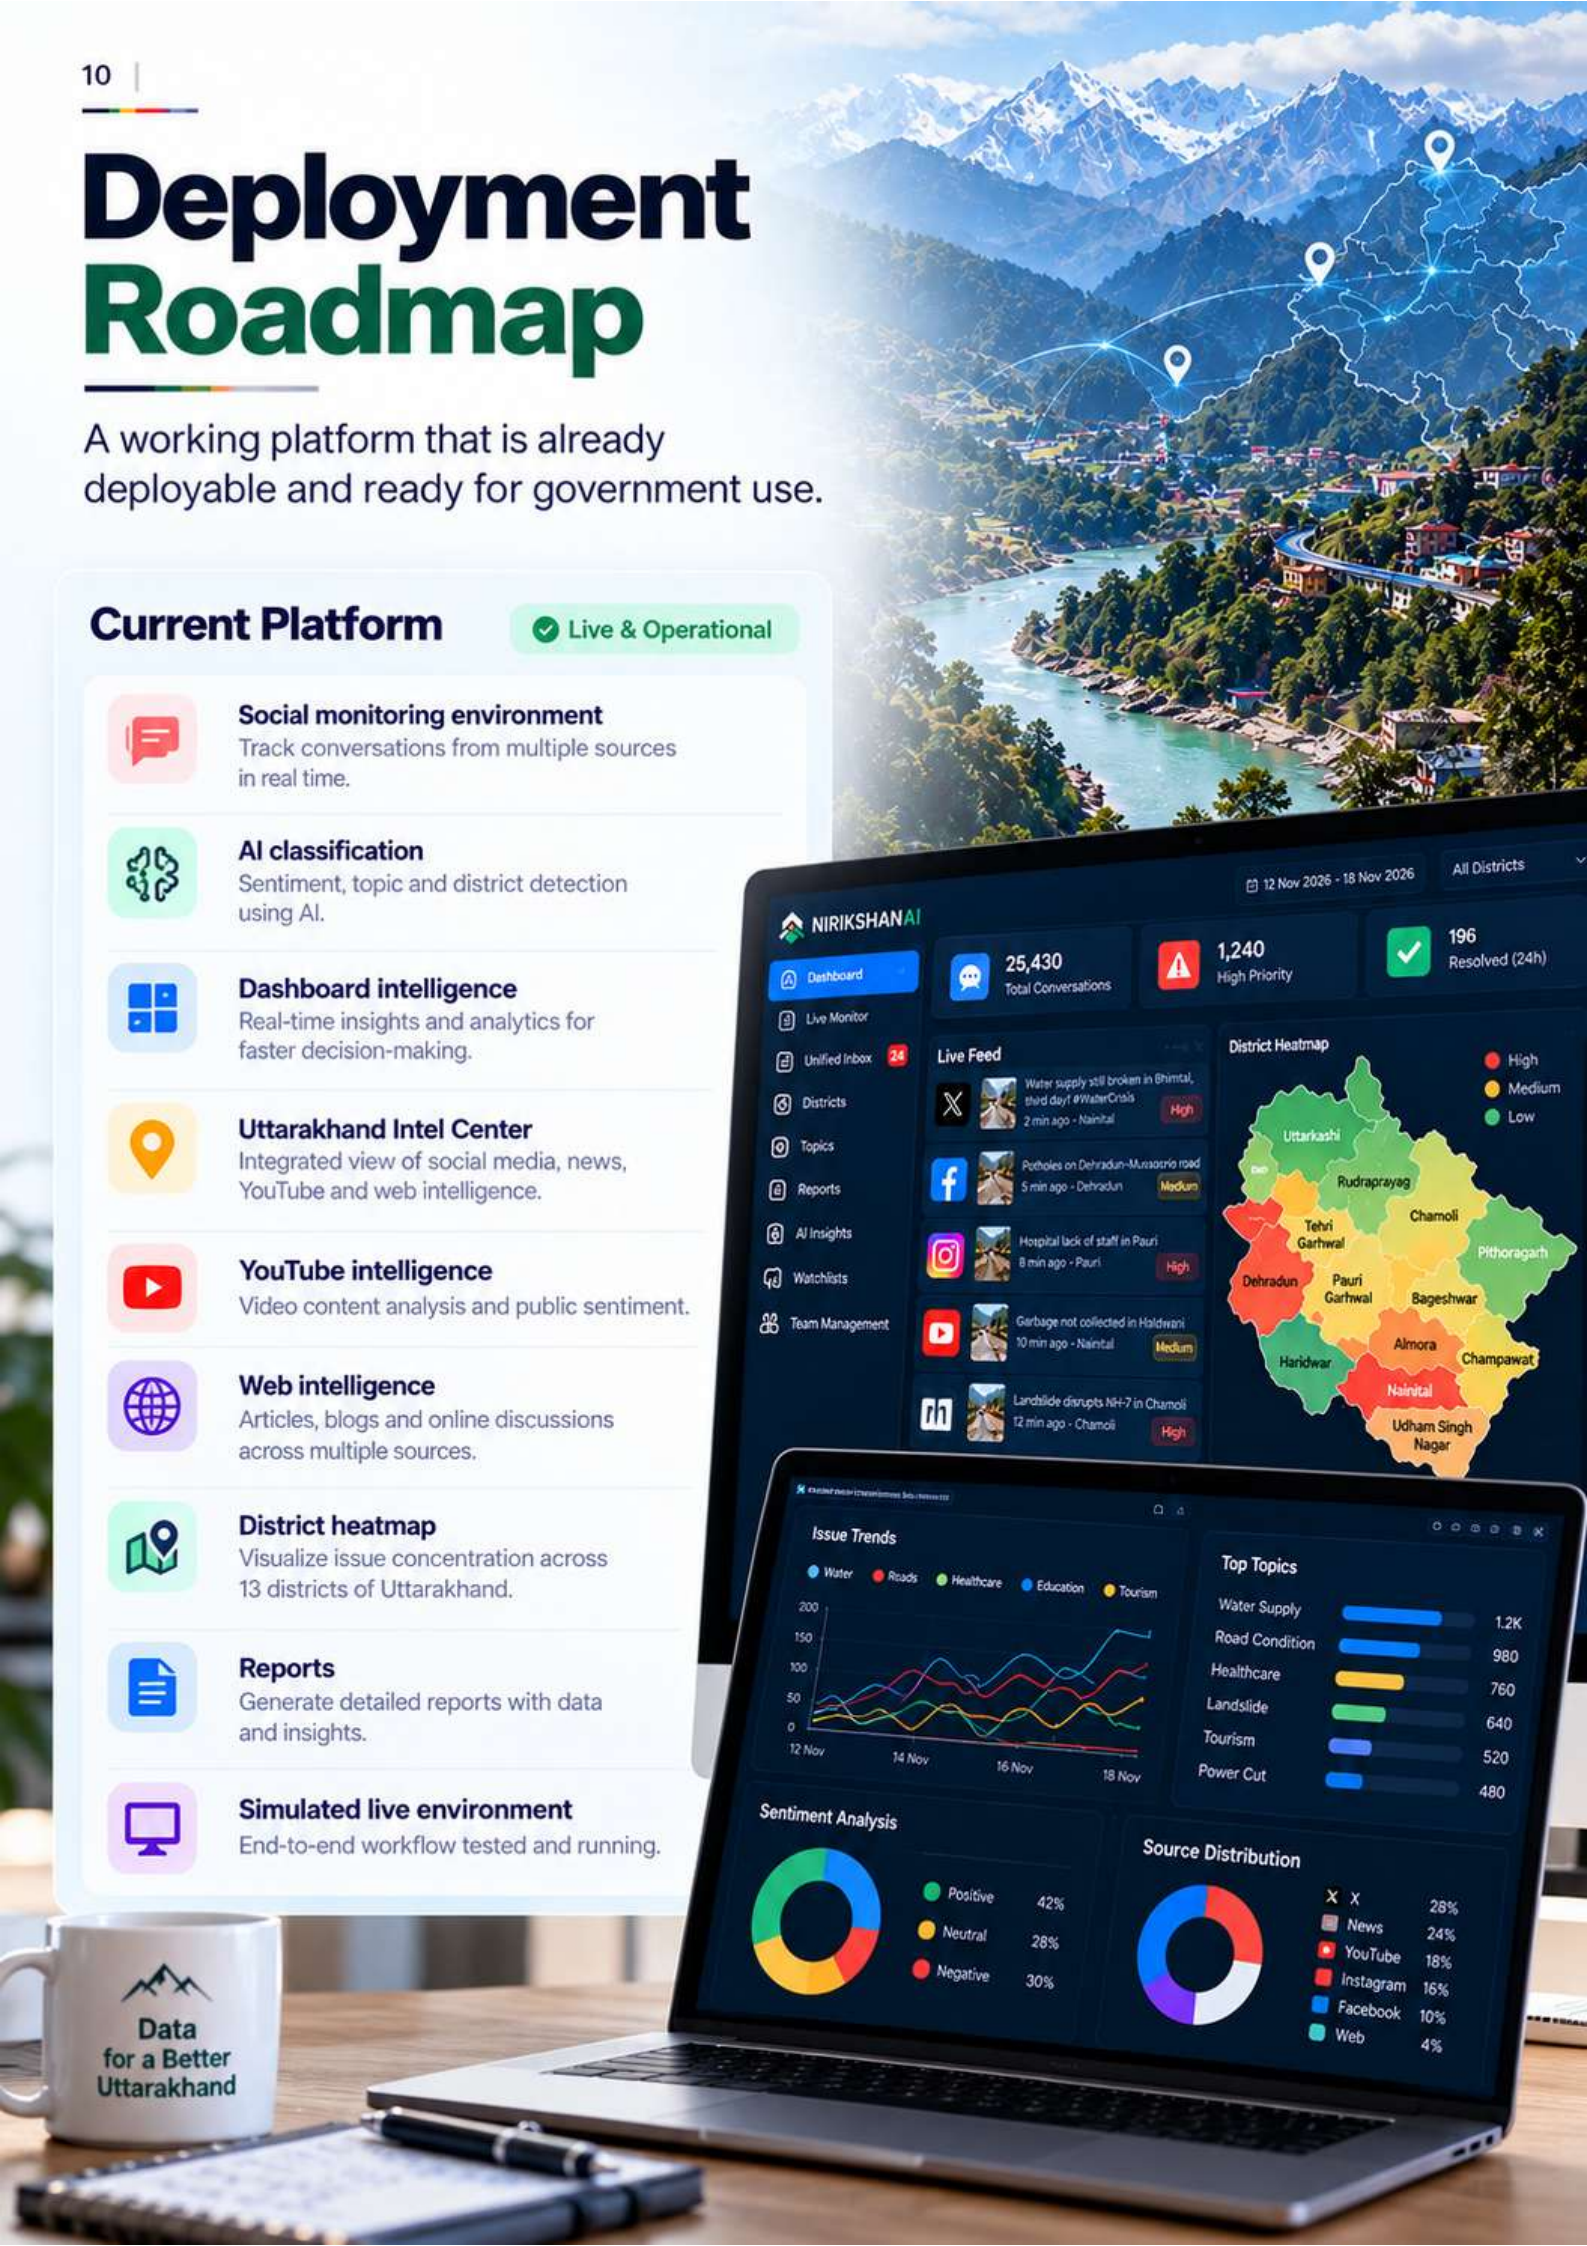

YouTube intelligence
Video content analysis and public sentiment.

Web intelligence
Articles, blogs and online discussions across multiple sources.

District heatmap
Visualize issue concentration across 13 districts of Uttarakhand.

Reports
Generate detailed reports with data and insights.

Simulated live environment
End-to-end workflow tested and running.
